HEIRSTONE CONSULTING

NEW CITIES | TASHKENT

The daytime city

New Tashkent, the capital's housing and office boom, and what makes a new city beside a capital fill, measured against 23 new cities from Cairo to Astana

SIX NUMBERS FROM THIS REPORT

19,721 ha
decreed for New Tashkent in 2023, east of the capital; the first 6,000 ha are planned for 600,000 people

49%
of the flats Tashkent must commission in 2026-2028 are assigned to New Tashkent: 67,000 of 135,676 (Heirstone analysis of Decree PF-29)

6.3%
of Uzbekistan's new housing was built in Tashkent city in 2025, which produces 19.9% of GDP and takes about 31% of mortgage lending

0.44 m²
of a city-centre flat bought by a month's net salary in Tashkent, more than in Almaty, Baku, Tbilisi or Istanbul (Heirstone Capital Housing Index, on crowd-sourced Numbeo data)

57%
of Tashkent's fixed investment was funded by foreign investment and loans in 2025, against 15% in 2018

40,000
civil servants moved to Egypt's New Administrative Capital in 2023 (Cairo Governorate), after its 70 km light rail line opened in 2022

ABOUT THIS REPORT

Heirstone Consulting advises governments, developers, investors and lenders on new cities, housing, offices, hotels and specialised real estate across the Middle East, Africa and Central Asia. This report uses public sources current at publication in 2026: decrees and resolutions, official statistics, central bank releases, the New Tashkent Directorate's own accounts, international lender documents, developer and operator disclosures and press reports citing them.

Where we combine published figures to produce a new one, such as a share, a per-hectare value or an index, the calculation is labelled Heirstone analysis and the inputs are shown. Som values for 2026 are converted at the Central Bank of Uzbekistan rate of UZS 11,899.09 per US dollar (2026), and som values for 2023-2025 at that year's average of quarter-end US Treasury reporting rates (UZS 11,855, 12,653 and 12,393).

READING THE EXHIBITS

Exhibits are numbered in page order. Each title states the finding; the line below gives the measure, unit and period, and the source line the issuer and year. Plans, targets and developer statements are attributed to the body that made them and are not forecasts by Heirstone.

SUMMARY

A new city beside a capital fills from its workday. New Tashkent's housing is decreed; the ministries, campuses and metro due in 2026-2028 are likely to set the pace at which residents arrive.

We assembled the decrees, accounts and project records for New Tashkent, Tashkent's housing, mortgage, office and hotel data, prices in six peer cities and a benchmark of 23 new cities and capitals from Brasília to Alatau.

1 **New Tashkent has moved from decree to delivery in three years.**

Resolution PP-232 of 2023 set aside 19,720.9 ha east of the capital. By late 2026 seven facilities worth US$1bn had been commissioned, including about 7,000 flats, 54 lots had been sold and officials put investment above US$2bn. More than ten ministries were working on site by 2025.

2 **The decree makes it the capital's main source of new homes.**

Decree PF-29 assigns New Tashkent 67,000 of the 135,676 flats Tashkent must commission in 2026-2028, or 49%. Its 2026 target of 1.2m m^2 exceeds all the housing Tashkent city commissioned in 2025, 1.0m m^2, in a city that produces 19.9% of GDP but built 6.3% of the country's new housing.

3 **Tashkent is inexpensive to buy in and costly to borrow in.**

Resale flats average about US$1,133 per m^2, below Tbilisi, Almaty, Baku and Istanbul, and on crowd-sourced Numbeo figures a month's net salary buys 0.44 m^2 of a city-centre flat. Mortgages cost 17-24% against gross rents of about 9%, state channels funded 89% of new-build mortgages in 2025, and the UZS 480m subsidy cap fits a flat of about 42-48 m^2.

4 **Foreign money funds most of Tashkent's investment, and Gulf capital has reached the new airport.**

Foreign investment and loans funded 57% of Tashkent's fixed investment in 2025. China supplied 28% of the city's foreign investment in the first nine months of 2025. Gulf-based Vision Invest holds 45% of the consortium building the new airport.

5 **New cities beside capitals fill from the workday.**

In our benchmark of 23 new cities, those that moved government or large employers in early, with rail, filled fastest. Egypt's New Administrative Capital opened its light rail in 2022, moved 40,000 staff in 2023 and, according to its city company, has nearly 30,000 residents. New Tashkent has scheduled its metro, campuses and stadium for its largest housing years.

WHAT IT MEANS

Government and the Directorate should tie each tranche of homes to staff relocations and transit, and publish quarterly counts of residents, staff and students on site.

Developers should design to the mortgage cap and to the daytime population of staff, students and visitors.

Investors and development lenders should fund the transit links and dollar-funded rental housing.

Banks should lengthen som funding and price by income, as Egypt's social housing fund does.

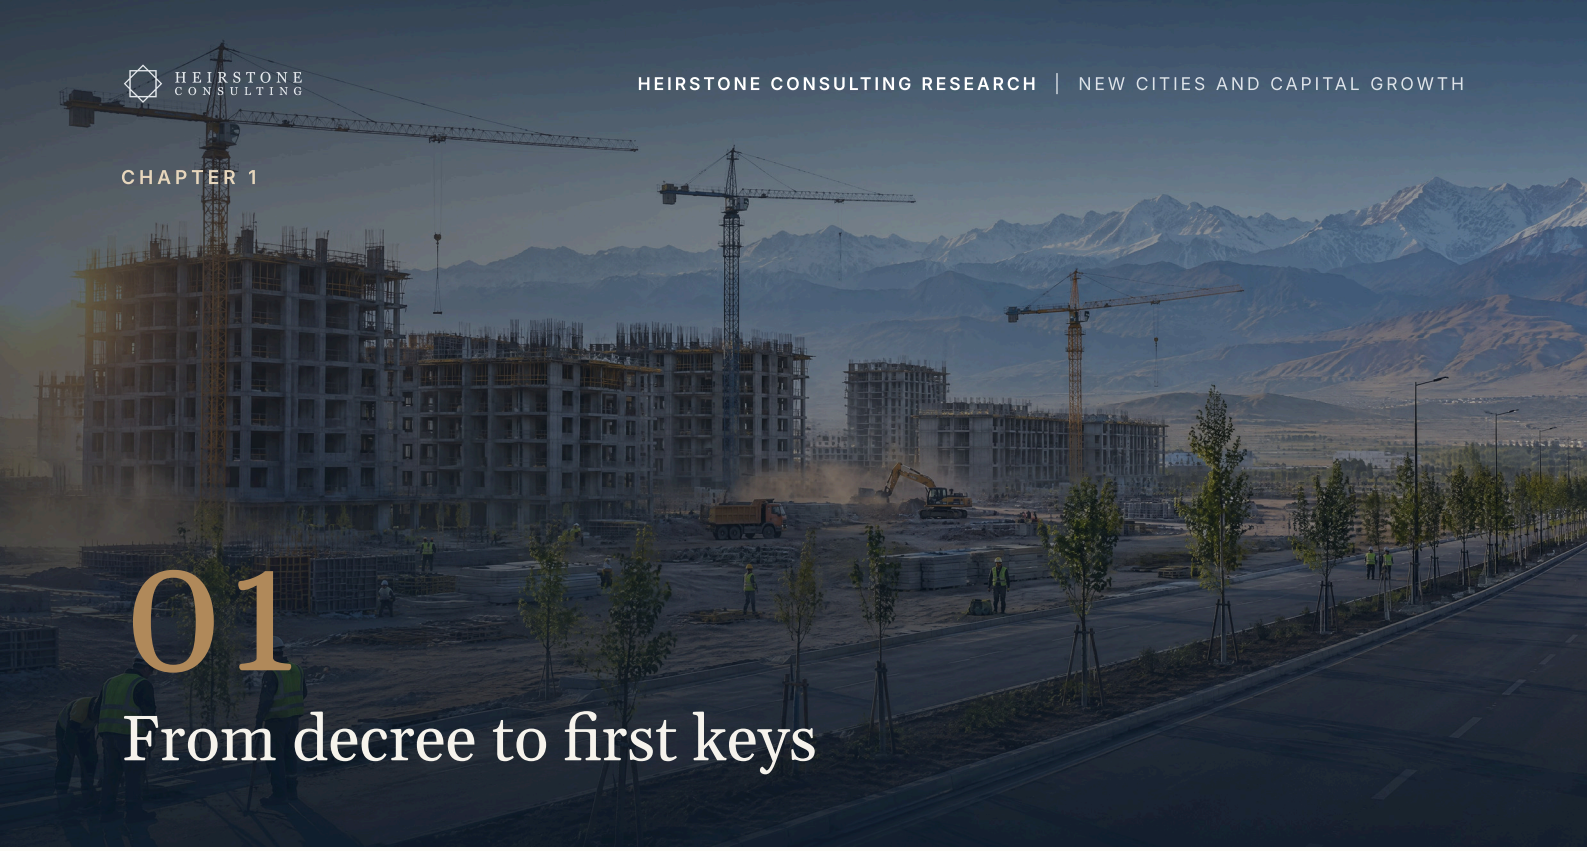

23

new cities and capitals in the Heirstone New City Benchmark, with New Tashkent measured against them

6

conditions in the Heirstone Fill Test for a new city beside a capital

CHAPTER 1

01 From decree to first keys

Resolution PP-232 of 2023 selected 19,720.9 ha in the Yuqorichirchiq and O‘rtachirchiq districts of Tashkent region for a new city and created a Directorate under the Cabinet of Ministers to build it. A Coordination Council chaired by the Prime Minister approves the master plan, and the Directorate sells or leases land for business on the state E-auksion platform. In 2024 the regional council transferred the land to Tashkent city.

PP-232 records Meinhardt of Singapore, Foster + Partners and OMA among the planners; Buro Happold credits the competition-winning masterplan to the London studio Cross Works. The first 6,000 ha are planned for 600,000 people, with infrastructure for them by 2033 according to the Directorate. In late 2026 seven facilities worth US$1bn were commissioned and ten projects worth US$2.5bn launched.

19,721 ha

decreed in 2023 in two districts of Tashkent region

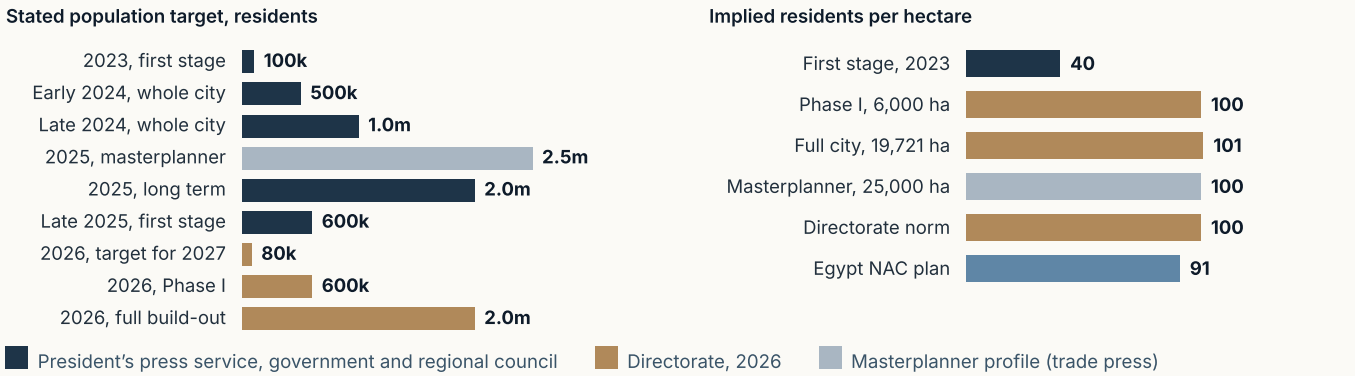

US$1bn

of facilities commissioned in late 2026, with US$2.5bn more launched

EXHIBIT 1

As the plan widened, the population target rose from 100,000 to 2 million and settled at about 100 residents a hectare

Left: population targets by date of statement; right: residents per hectare implied by each target and its stated area, with Egypt’s New Administrative Capital (NAC) for comparison

Source: President of Uzbekistan press service (2023; 2024; 2025); Gazeta.uz (2024); Government portal (2025); Parametric Architecture (2025); Directorate, newtashkent.uz (2026); Ahram Online (2023) for the NAC, 6.5m on 170,000 feddans (714 km²). Densities: **Heirstone analysis.**

WHERE THE NEW CITY SITS

New Tashkent lies within commuting range of the old centre, and its links to it are under construction

EXHIBIT 2

New Tashkent's stadium is about 17 km from Tashkent's centre and 13 km from Dustlik, where the metro line starts

Schematic location map at OpenStreetMap or approximate positions; New Tashkent's boundary and most interior sites are not published

Source: Positions: OpenStreetMap for the city centre, Tashkent City, Chilanzar, Qibray and Nurafshon; approximate, estimated for mapping, for the airport, Dustlik, the stadium, Yangibozor, Yangihayot and the brown rings (within about 2 km). Uzbekistan Airports via Anhor.uz (2026) for airport passengers; Kun.uz (2025) and Directorate (2026) for the metro; Interfax (2026) for the airport districts. Distances: **Heirstone analysis.**

Distance. The stadium, the only interior site we can place, lies about 17 km in a straight line from the centre of Tashkent and 13 km from Dustlik, where the first New Tashkent metro section starts. Among the adjacent peers in chapter 5, Egypt's New Administrative Capital lies 35 to 50 km from central Cairo and Alatau about 50 km from Almaty.

Links. Kun.uz reported in 2025 that Turkey's Hvav Yapi would fund an 8 km first section with three stations for US$110m, due by the end of 2026; the Directorate's 2026 list shows 4 km and two stations. The full line is to run 21 km with nine stations and carry 230,000 passengers a day. A bridge over the Chirchik for 40,000-50,000 cars a day and a two-track tram line began in late 2025.

17 km

from Tashkent's centre to the stadium site in a straight line, approximate (Heirstone analysis)

44.9%

of the area of Tashkent's General Plan to 2045 lies in New Tashkent (Heirstone analysis)

The city-wide plan. Cabinet Resolution 880 of 2024 approved Tashkent's General Plan to 2045 for 43,873 ha, with the population rising from 3.0 million to 7.4 million, 10,000 ha of new green space, a 15,000 ha green belt and a 60% public transport share. Resolution PQ-191 of 2026 targets a metro of 103 km and 79 stations carrying 1.8 million passengers a day.

The old-city business district. Tashkent City, set up by Cabinet Resolution 559 in 2017, has eight lots on 66.3 ha with 1.91m m^2 of construction, including Nest One, at 266.5 m Uzbekistan's first skyscraper, and the 258-room Hilton opened in 2019. Decree PF-48 of 2026 created the Tashkent International Financial Centre within it, under English and Welsh common law with tax benefits to 2076. New Tashkent's Phase I passport lists 25.0m m^2 of floor area, about 13 times Tashkent City.

The new airport. A consortium of Vision Invest (45%; Saudi according to Kun.uz, Emirati according to Interfax), Japan's Sojitz (30%), Incheon International Airport Corporation (15%) and Uzbekistan Airports (10%) signed the PPP in 2026 for a first stage of US$2.5-2.6bn and up to 20m passengers a year, due by the end of 2030 on about 1,310 ha in the O'rtachirchiq and Quyichirchiq districts.

WHAT IS OPEN, UNDER WAY AND PLANNED

Utilities, the first homes and a campus are open; the metro, stadium and airport follow

EXHIBIT 3

New Tashkent opened its utilities, first homes and first campus building in 2025-2026, and its main transport links are due in 2026-2030

Named projects in and beside New Tashkent, status as reported at the date shown

PROJECT	SCALE	BUILDER OR INVESTOR	STATUS AS REPORTED	STAGE
HOMES				
Sharq Bahori complex	95 ha; almost 15,000 flats planned	not named	phase 1, about 7,000 flats, opened 2026	OPEN
Housing due in 2026	20,000 flats in all, for at least 70,000 people	several developers	due by end-2026	UNDER WAY
Silk City, Mavj, Marjon	residential complexes	not named	construction launched 2026	UNDER WAY
'Astana' massif	3,162 flats; 10.5 ha first stage; US$200m	BI Group (Kazakhstan)	first stage announced 2025	PLANNED
GOVERNMENT AND CULTURE				
Administrative zone	60+ buildings; 150 bodies to relocate	state	10+ ministries on site (2025)	UNDER WAY
National Library	30,000+ m²; 1,420 readers	state	90% finished, 2026	UNDER WAY
EDUCATION				
Nizami university	40 ha; 20,000 students; 5,000 beds	state	first building open, 2026	OPEN
New Uzbekistan University	50 ha; 10,000 students; about US$200m	Ozguven (Turkey), builder	opening 2027	UNDER WAY
Bauman MSTU branch	6 ha; 2,000 places; 800 beds	state	land allocated 2025	PLANNED
State University of Law	new campus; concessional IFI funds	state	move by 2028	PLANNED
SPORT, HEALTH AND BUSINESS				
Olympic City	100+ ha; about US$290m	CAMC Engineering (China)	completed 2025	OPEN
Central Stadium	55,000 seats; US$100m	not named	65% complete, 2026	UNDER WAY
Central hospital	120 beds	not named	construction launched 2026	UNDER WAY
Metropolis business centre	818,000 m², about 500,000 m² business	not named	construction launched 2026	UNDER WAY
Deep Tech Park	US$320m, preliminary	not named	launched 2026	UNDER WAY
Regional hotels	12 three-star hotels, typically 62 rooms	regions and banks	built 2025; being sold at auction	OPEN
UTILITIES AND TRANSPORT				
Trigeneration plant	heat and cooling, 100,000 homes; US$73m	Mimsan (Turkey)	commissioned 2026	OPEN
Substation and lines	US$95m	Haocheng (China)	commissioned 2026	OPEN
Networks and roads	13 km sewers, 4.5 km mains, 18 km roads	state	delivered by 2026	OPEN
Metro to Tashkent	section 4-8 km; line 21 km, 9 stations	Hvav Yapi (Turkey), first section	section end-2026; line 2027	UNDER WAY
Chirchik bridge	40,000-50,000 cars a day; tram	state	begun late 2025; due 2027	UNDER WAY
New airport (adjoining)	1,310 ha; 20m passengers; US$2.5-2.6bn	Gulf-led consortium	PPP 2026; opens end-2030	UNDER WAY

Source: President of Uzbekistan press service (2025); Government portal (2025); Spot.uz (2025; 2026); Kun.uz (2025); Lex.uz (PP-276); Interfax (2026); Directorate (2026). First metro section: 8 km and three stations (Kun.uz) or 4 km and two stations (Directorate).

Utilities came first: more than US$700m went into infrastructure in 2025, and the city will not be connected to gas, according to the Directorate. Resolution PP-162 of 2024 links the government move to the sale of the old ministry buildings in central Tashkent.

Three of the four campuses publish capacities: about 32,000 student places and 5,800 dormitory beds in all (Heirstone analysis). Buildings for 2,600 civil servants were under way in late 2026. About 10,000 people were working on site at the end of 2025.

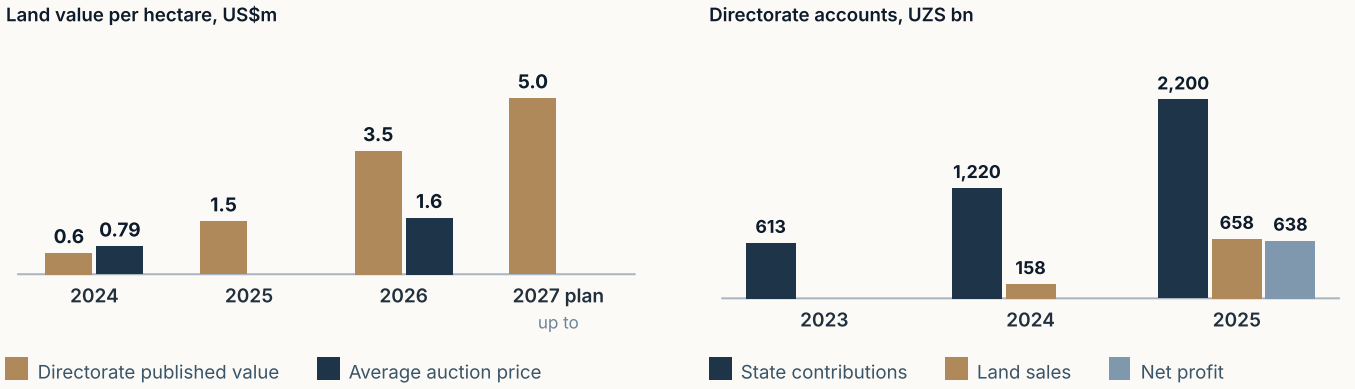

LAND AND THE DIRECTORATE

Land prices at auction have nearly doubled in two years, while the state funds most of the early construction

EXHIBIT 4

Auction prices for New Tashkent land rose from about US$0.79m to US$1.6m a hectare in two years; the Directorate's published value is US$3.5m

Left: land value per hectare, US$m: Directorate's published values and average auction prices; right: Directorate state contributions, land sales and net profit, UZS bn

Source: Directorate for the Construction of New Tashkent, newtashkent.uz development dynamics and financial statements (accessed 2026); Spot.uz (2026) for auction averages of UZS 10bn and UZS 19bn per ha. Auction prices converted at UZS 12,653 per US$ for 2024 (average of quarter-end US Treasury rates) and UZS 11,899.09 for 2026 (Central Bank of Uzbekistan). **Heirstone analysis.**

The Directorate's accounts show the land model at an early stage. Land sales brought in UZS 658.3bn in 2025, about US$53m, and the Directorate reported a net profit of UZS 637.6bn. State contributions totalled UZS 4.0trn in 2023-2025, about US$326m at each year's rate, and land transferred to its capital reserves in 2024, UZS 29.4trn, makes up most of its UZS 43.9trn of assets. Borrowings of UZS 1.34trn included Aloqa Bank loans at 22% and 24%.

Investment commitments per lot have grown: about US$43m a lot in mid-2025 (13 lots, US$554m) and US$83m by the end of 2025 (24 lots, US$2bn). By late 2026, 54 lots had been sold, three for projects above US$100m, and works had begun on 26; business was building on 94 ha against more than 1,000 ha of state construction.

A gap between land sold and building started is usual in a new city's first years. In the Philippines' New Clark City, 15% of committed investment had been infused six years after groundbreaking (Heirstone analysis of BCDA figures); Egypt's ACUD says it began phase-two infrastructure in 2025 once 70% of that phase's land had been allocated.

The late-2026 package addresses the next step: infrastructure fees cut three- to tenfold by use, a dedicated official and a separate investment agreement for projects of US$50m or more, Swiss Challenge allocation for large sites, 100 ha for each Tashkent district and each of 13 other regions, and the first 50 lots reserved for foreign investors.

UZS 19bn

average auction price per hectare in 2026, about US$1.6m or US$160 per m² of land

26 of 54

lots sold by late 2026 on which works had begun

UZS 637.6bn

Directorate net profit in 2025, about US$51m

CHAPTER 2

02

Half the capital's new flats

49%

of the flats Tashkent must commission in 2026-2028 are assigned to New Tashkent under Decree PF-29 (Heirstone analysis)

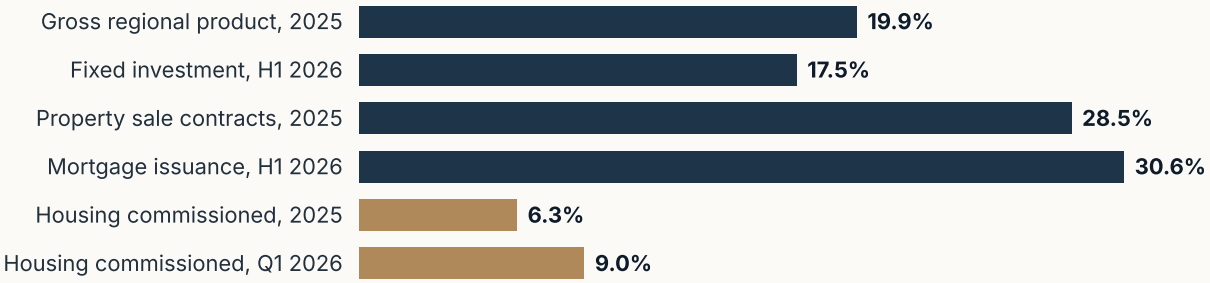

1.2x

New Tashkent's 2026 housing target in m², against all the housing Tashkent city commissioned in 2025

EXHIBIT 5

Tashkent produces 19.9% of GDP and takes about 31% of mortgage lending, but commissioned 6.3% of the country's new housing in 2025

Tashkent city's share of the Uzbekistan total, %, latest period

Source: Statistics Agency of Uzbekistan: SIAT 544 and 1299 (GDP and gross regional product, 2025); housing press releases (2026); investment in fixed capital, first half of 2026. CERR via Spot.uz (2026) for sale contracts; Central Bank of Uzbekistan via Spot.uz (2026) for mortgages. **Heirstone analysis.**

Tashkent city commissioned 1.0m m² of housing in 2025 out of 15.9m m² nationally, while Tashkent region next door delivered 2.0m m². The presidency said in 2023 that the city needs about 20,000 flats a year, and the Asian Development Bank estimates that Uzbekistan needs about 145,000 urban homes a year until 2040.

The capital's population has grown quickly. It rose 26.6% between 2019 and 2026 to 3.18 million, or 18.6% excluding Yangihayot, a district added in 2021, and Bektemir more than doubled. Decree PF-29 of 2026 sets the response: Tashkent city, including New Tashkent, is to commission 42,025 flats in 2026, 45,125 in 2027 and 48,526 in 2028, with the head of the New Tashkent Directorate and the city's hokims personally responsible.

1.0m m²

of housing commissioned in Tashkent city in 2025, out of 15.9m m² nationally

3.18m

Tashkent residents at the start of 2026, against 2.51m in 2019 including boundary changes

HOW MANY PEOPLE THE NEW FLATS COULD HOUSE

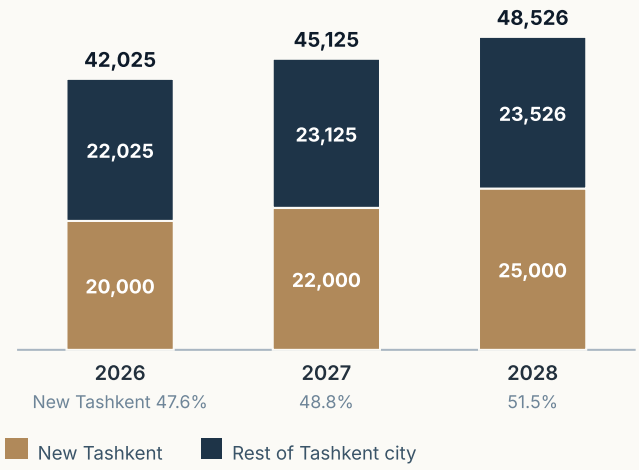

New Tashkent's decreed flats could house as many people each year as the capital has been adding

EXHIBIT 6

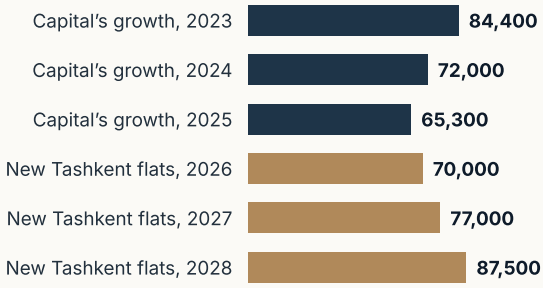

New Tashkent is to deliver about half of Tashkent's new flats in 2026-2028, enough for 70,000-87,500 people a year, close to the capital's recent annual growth

Left: flats to be commissioned under Decree PF-29, New Tashkent and the rest of Tashkent city; right: people housed by New Tashkent's flats at 3.5 per flat, against Tashkent city's population growth each year (start of year to start of year)

Flats to be commissioned, Decree PF-29

People: capital's annual growth and capacity of New Tashkent's flats

Source: President of Uzbekistan, Decree PF-29, Annex 2 (2026); Spot.uz (2026) for 20,000 flats for at least 70,000 people, the basis for 3.5 people per flat; Statistics Agency of Uzbekistan, permanent population (SDMX 246). **Heirstone analysis.**

Absorption is the planning question this raises. Over 2026-2028 New Tashkent's 67,000 flats could house about 234,500 people at 3.5 a flat, slightly more than the 221,700 the capital added in 2023-2025. The Directorate's target of 80,000 residents by 2027 is close to one year of the city's recent growth.

Part of the demand will come from within the city. The hokimiyat plans to resettle 12,000-15,000 residents a year under its renovation programme, and the General Plan's 7.4 million by 2045 implies growth of 4.55% a year, against 3.43% a year in 2019-2026 including boundary changes.

Who moves depends largely on where people work. A family that buys in 2027 and works in the old city will commute across the Chirchik; a civil servant whose ministry has moved, or a student at a new campus, will not. Chapter 5 shows that this balance between residents and the daytime population decided how fast other new cities filled.

The decree also sets the size of the product. In 2025 Tashkent city commissioned 5,900 dwellings by the Statistics Agency's preliminary count, whose unit definition is unclear, and 1.0m m^2 of floor area. PF-29's New Tashkent targets of 1.2m m^2 for 20,000 flats in 2026 and 1.5m m^2 for 25,000 in 2028 imply an average of 60 m^2 a flat.

234,500

people New Tashkent's 2026-2028 flats could house at 3.5 a flat (Heirstone analysis)

221,700

people added to Tashkent's population from the start of 2023 to the start of 2026

60 m^2

average flat size implied by the PF-29 targets for New Tashkent (Heirstone analysis)

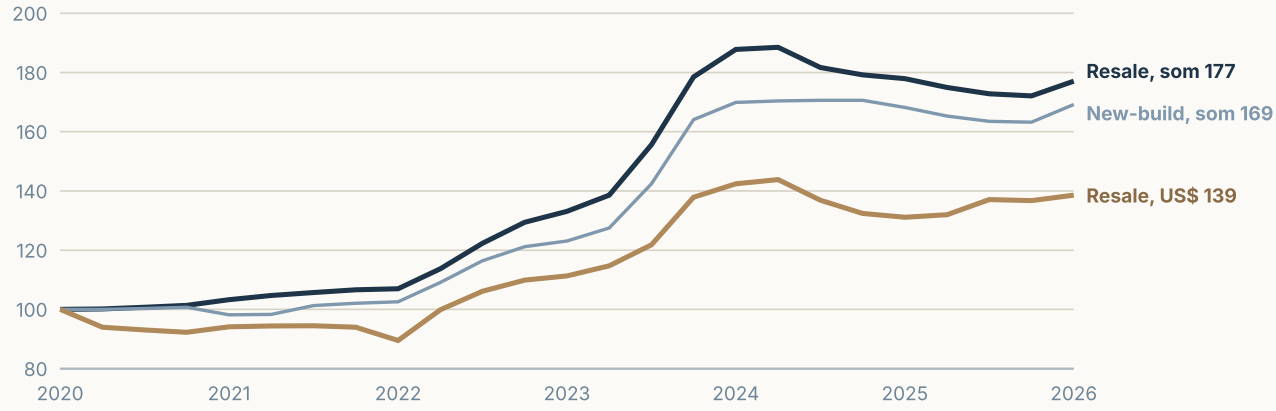

PRICES

Prices jumped in 2023 and have moved little in dollars since early 2024

EXHIBIT 7

Tashkent resale prices rose 77% in som and 39% in dollars from early 2020 to early 2026, most of it in 2022-2023

Statistics Agency housing price index for Tashkent city, chained to 2020-Q1 = 100: resale and new-build in som, resale in US$ at quarter-end rates; quarterly to 2026-Q1

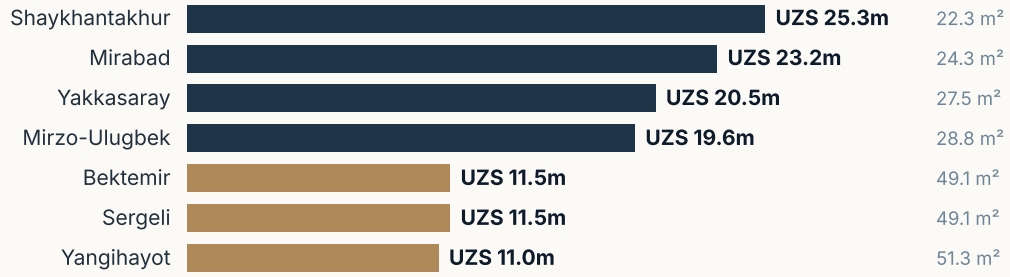

Source: Statistics Agency of Uzbekistan, SIAT 1306 and 1307 (quarterly indices, previous quarter = 100); US Treasury reporting rates for UZS. Chaining and US$ restatement: **Heirstone analysis.** The agency moved to a hedonic method based on OLX.uz listing prices from 2026-Q2.

EXHIBIT 8

Asking prices run from UZS 11m per m² in Yangihayot to UZS 25.3m in Shaykhantakhur, so a home at the subsidy cap buys 22 to 51 m²

Average apartment asking price by district, UZS m per m², 2026; right: floor area of a UZS 565m home, the most the UZS 480m mortgage cap finances with a 15% deposit

Source: National Committee for Urbanisation, citing the National Centre for Mass Valuation (Spot.uz, 2026; Advice.uz, 2026); Spot.uz (2026) for the cap and deposit. The release names only the highest and lowest districts; asking prices are not transactions. Floor areas: **Heirstone analysis.**

CERR, the government's economic research centre, put the average resale price at US$1,133 per m² in early 2026, up 3.2% on a year earlier, with new-build prices up 11.5%. CERR's dollar readings were US$1,140 in early 2024 and US$1,104 at the end of 2025, with a 4.8% annual fall to mid-2025 in between. The official index fell for six quarters from mid-2024, 8.7% in all, before rising 3.3% in the first quarter of 2026. By 2025 new-builds sold at about a 3% premium to resale, against a 3-6% discount in 2022, according to the central bank.

Central districts ask more than twice the outer ring, and the capped mortgage home therefore buys a family flat only in the outer districts. A mass valuation in 2026 put more than 600,000 Tashkent apartments at UZS 426.7trn, 7.4 times their cadastral value. Sales rose 18.4% nationally in the first eight months of 2026 and 27.5% in Tashkent, with a monthly peak of 43,600 in the first quarter, ahead of the move to bank escrow settlement in the second.

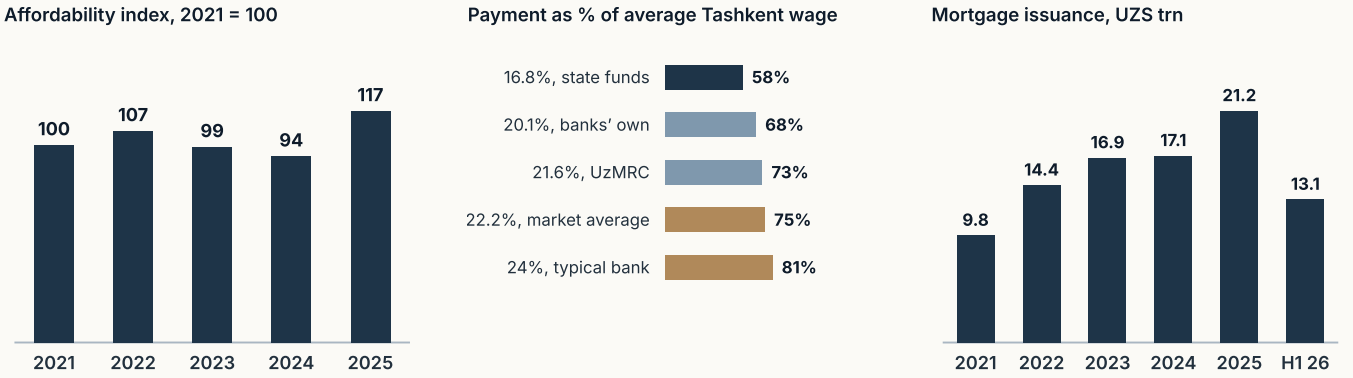

AFFORDABILITY AND MORTGAGES

Wages have caught up with prices; a full mortgage at the cap still takes most of an average salary

EXHIBIT 9

Wages bought 17% more Tashkent housing in 2025 than in 2021, but a capped mortgage costs 58-81% of the average Tashkent wage

Left: Heirstone Tashkent affordability index, national average wage divided by Tashkent resale price index (annual means), 2021 = 100; centre: monthly payment on a UZS 480m, 20-year mortgage as % of the Tashkent average wage of UZS 12.01m (H1 2026), by rate; right: mortgage issuance, UZS trn

Source: Statistics Agency of Uzbekistan, SIAT 500 (annual wages) and 1307 (price index); National Statistics Committee via Spot.uz (2026) for the Tashkent wage; Central Bank of Uzbekistan via Spot.uz (2026) for issuance and H1 2026 rates; Kursiv Uzbekistan (2026); Spot.uz (2026). Index and payments: **Heirstone analysis.**

Affordability has improved since 2023. The national average wage rose 94.6% between 2021 and 2025, while the Tashkent resale index rose 66.0% on annual averages. A 60 m^2 resale flat at the early-2026 average costs about 5.6 years of the average Tashkent wage of UZS 12.01m a month, about US$1,009.

Finance is the constraint. Banks lent UZS 21.2trn of mortgages in 2025, up 21.3% a year since 2021, and UZS 13.1trn in the first half of 2026, 75% of it for new-builds; Tashkent took 30.6%. The book reached UZS 79.4trn, 4.3% of GDP, at the start of 2026. State channels funded 89% of new-build mortgages in 2025, and 20,500 borrowers received subsidised loans worth UZS 6.2trn.

The state programme lends at 16-17% with a 15% deposit over up to 20 years, while 24 of 34 banks charged about 24% in mid-2026. The state plans 30,000 subsidies in 2026 worth UZS 1.17trn, and the refinancing cap is UZS 480m in Tashkent and New Tashkent against UZS 380m elsewhere. The cap finances a home of about UZS 565m, roughly 42 m^2 at the city's resale average or 48 m^2 at US$1,000 per m^2.

Rents of about US$8.7 per m^2 a month in early 2026, according to Anhor.uz, give a gross yield of about 9.2% on the resale average, below every mortgage rate on offer, so a rental flat bought with a mortgage does not cover its interest from rent. The Uzbekistan Mortgage Refinancing Company placed its first mortgage bond, UZS 40.5bn, in 2026.

+17%

more housing per wage in 2025 than in 2021 on the Heirstone Tashkent affordability index

UZS 565m

the largest home the UZS 480m cap finances with a 15% deposit, about US$47,500

89%

of new-build mortgages funded through state channels in 2025 (central bank)

CHAPTER 3

03 Cheap to buy, dear to borrow

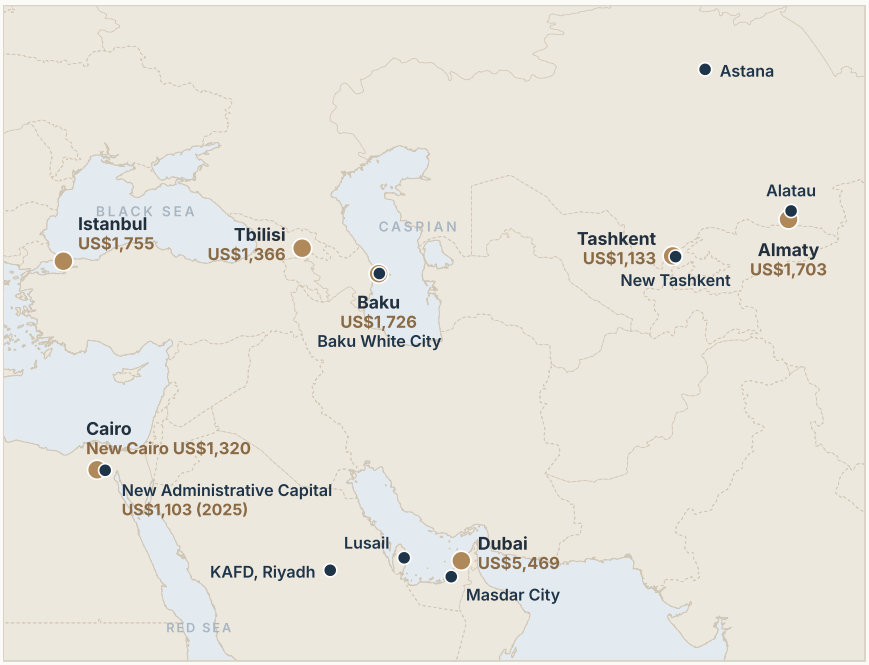

Against the cities it competes with for residents and investors, Tashkent is inexpensive per square metre and affordable relative to local salaries. Borrowing, by contrast, is expensive.

This chapter compares Tashkent with Almaty, Baku, Tbilisi, Istanbul, Dubai and Cairo on price, on how much space a salary buys and on the gap between mortgage rates and rents, and then looks at offices and hotels.

EXHIBIT 10

From Istanbul to Almaty, average flat prices run from about US$1,100 to US$1,750 per m²; Dubai stands apart at about US$5,500

Price peers (gold, latest average price per m² from the local source) and the new-city peers in the Heirstone benchmark (navy)

Source: CERR (2026); Kazakhstan Bureau of National Statistics (2026); Azerbaijan Appraisers Society via Caliber.az (2026); Galt & Taggart (2026); CBRT via Global Property Guide (Q4 2025); Dubai Land Department via fäm Properties (2025); Aqarmap via Global Property Guide (2025). Coordinates: OpenStreetMap; New Tashkent at its stadium (approximate).

THE HEIRSTONE CAPITAL HOUSING INDEX

Price: the latest average price per m² from the best local source, in US$ as published or at US Treasury rates for the end of the third quarter of 2026.

Reach: m² of a city-centre flat bought by one month of average net salary, on Numbeo's crowd-sourced figures for 2026, which are indicative only but measure all six cities on the same basis.

Carry: the mortgage rate minus the gross rental yield, in percentage points, on the same Numbeo basis.

Cairo is shown for price only, on Aqarmap's end-2025 listing basis; that series changed basis during 2025, so we do not combine it with other measures.

Almaty and Astana. Kazakhstan's statistics bureau put new flats in Almaty at KZT 739,800 per m² and resale at KZT 749,500 in 2026, with Astana's new-builds at KZT 747,100, so the two cities price almost level.

Tbilisi. Galt & Taggart counted 3,748 flats sold in a month of 2026 and a gross yield of 8.4%; permitted living area fell 34.4% in the first five months.

Istanbul and Baku. Istanbul prices rose 26.3% year on year in 2026 in nominal lira, while Turkey's fell 6.5% in real terms (central bank index). Baku prices rose 8.5% in the year to the second quarter, according to the Appraisers Society.

Dubai. Dubai Land Department records show AED 686.8bn of sales across 215,736 transactions in 2025, 69% of them off-plan. Policy rates in 2026 were 3.9% in the UAE, 8.25% in Georgia, 14% in Uzbekistan and 16.25% in Kazakhstan (Trading Economics).

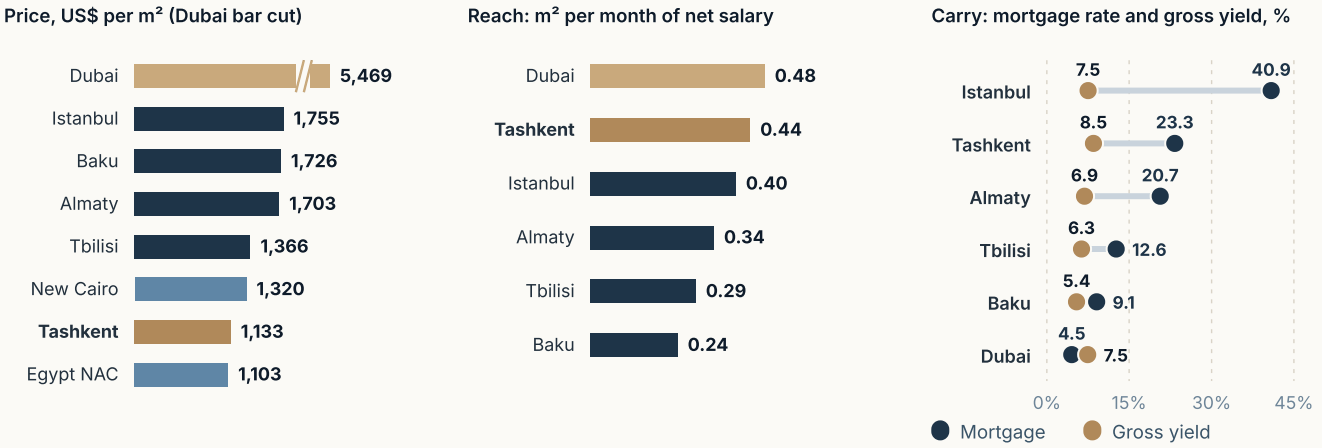

THE HEIRSTONE CAPITAL HOUSING INDEX

Tashkent is among the cheapest of its peers to buy in and among the most expensive to borrow in

EXHIBIT 11

On crowd-sourced figures, a month's salary buys more of a Tashkent flat than in Almaty, Baku, Tbilisi or Istanbul, and mortgage rates exceed rental yields by about 15 points

Heirstone Capital Housing Index, 2025-2026: average price per m², US$; m² of city-centre flat per month of net salary; mortgage rate and gross rental yield, %; reach and carry are indicative

Source: Price: CERR (2026, resale); Kazakhstan Bureau of National Statistics (2026, resale, KZT 749,500 at KZT 439.98); Azerbaijan Appraisers Society via Caliber.az (2026); Galt & Taggart (2026, resale in post-2013 buildings); CBRT via Global Property Guide (Q4 2025); Dubai Land Department via fäm Properties (2025, AED 1,866 per sq ft); Aqarmap listings via Global Property Guide (2025). Reach and carry: Numbeo (2026, crowd-sourced and indicative). **Heirstone analysis.**

Price. Tashkent's average resale price of US$1,133 per m² sits below Tbilisi's US$1,366 for resale flats in post-2013 buildings, Almaty's US$1,703, Baku's US$1,726, according to the Azerbaijan Appraisers Society, and Istanbul's US$1,755. Dubai's 2025 average on Dubai Land Department records is about US$5,469. In Egypt, Aqarmap's end-2025 listing averages were US$1,320 in New Cairo and US$1,103 in the New Administrative Capital, a new city already priced on a par with Tashkent's established resale market.

Reach. On Numbeo's crowd-sourced figures a month of net salary buys 0.44 m² of a city-centre flat in Tashkent, more than in Istanbul (0.40), Almaty (0.34), Tbilisi (0.29) or Baku (0.24); only Dubai, with the highest salaries, is higher at 0.48.

Carry. Numbeo's indicative figures put Tashkent's mortgage rate at 23.3% and its city-centre gross yield at 8.5%, a gap of 14.8 points, second to Istanbul's 33.4 among the six. In Baku and Tbilisi the gap is 4-6 points, and in Dubai rents yield more than a mortgage costs. Kazakhstan offers a state model: Otbasy Bank holds close to 60% of a KZT 7.5trn mortgage market at an average rate of 10%.

Egypt's model. Egypt's Social Housing and Mortgage Finance Fund had facilitated 583,008 mortgages by mid-2024, according to CAHF, and since late 2024 has charged 8% to low-income and 12% to middle-income buyers over up to 20 years with a 20% deposit. A separate 2021 initiative at no more than 3% had reached 668,504 beneficiaries by late 2025, according to Global Property Guide.

14.8 pts

gap between Tashkent's mortgage rate and gross rental yield on Numbeo's crowd-sourced, indicative figures (Heirstone analysis)

583,008

mortgages facilitated by Egypt's social housing fund by mid-2024 (CAHF), with income-tiered rates

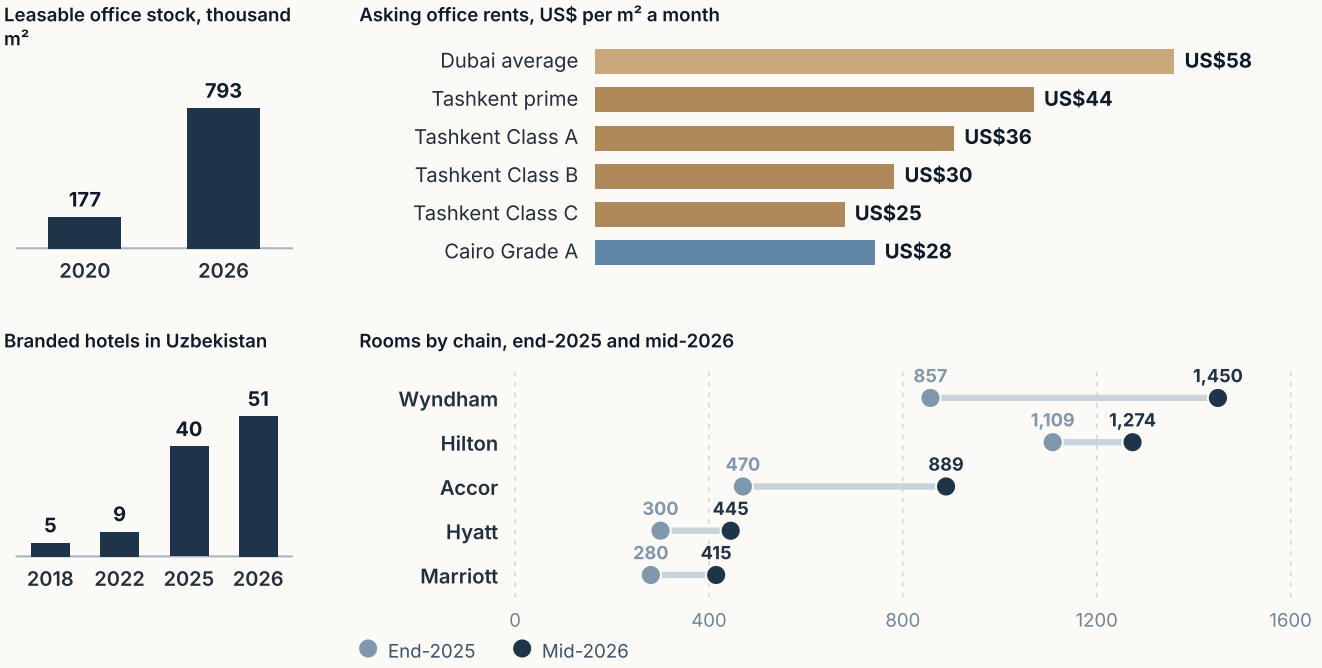

OFFICES AND HOTELS

Office stock has grown four and a half times since 2020, and international hotel brands grew their rooms by 28% in seven months

EXHIBIT 12

Tashkent's leasable office stock rose from 177,000 m² to 793,000 m² after 2020, and international brands added about 1,470 rooms in Uzbekistan in seven months of 2026

Top: Tashkent leasable office stock, thousand m²; asking rents by class, US$ per m² a month, with Dubai and Cairo. Bottom: internationally branded hotels in Uzbekistan (2018, early 2022, end-2025, mid-2026); rooms by chain at end-2025 and mid-2026

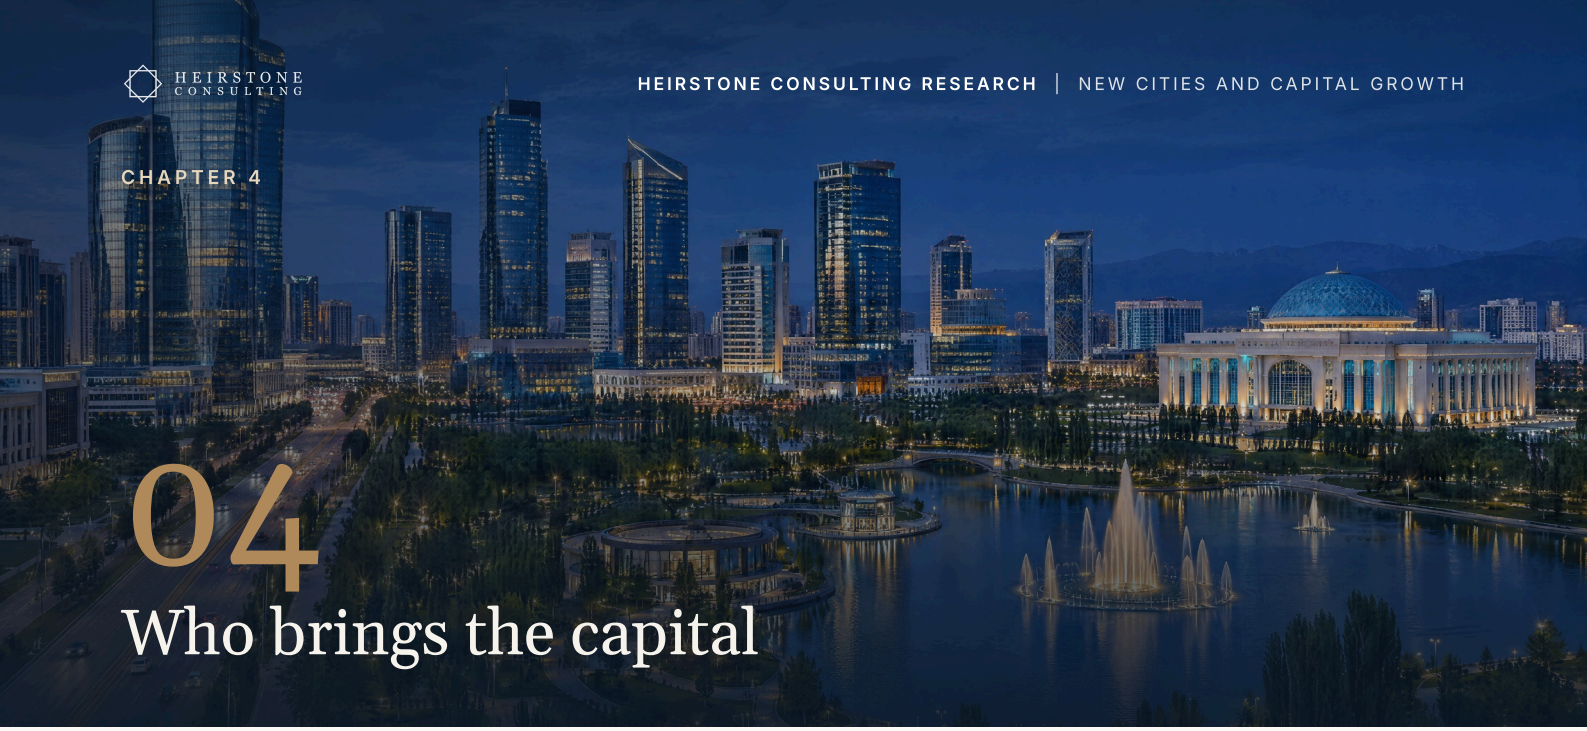

Source: Commonwealth Partnership (CMWP) via Spot.uz (2026), rents including VAT and operating costs; Savills via Khaleej Times (2026), AED 238 per sq ft a year; Knight Frank via EnterpriseAM (2026), US$335.60 per m² a year; Tourism Committee of Uzbekistan (2026); Ministry of Tourism via Spot.uz (2022). Rent bases differ. Conversions: **Heirstone analysis.**

Offices. Commonwealth Partnership counts 1.02m m² of office stock in Tashkent, 793,000 m² of it leasable; Class B makes up 55%. Vacancy was 16.9% in 2026, against 25% in 2024, and about 67,000 m² of the vacant space is in prime buildings such as Summit and BoMI. Trade and distribution firms take 25% of demand, IT 16% and finance 15%.

Thirteen business centres with more than 112,000 m² are due over four years. New Tashkent's Metropolis centre plans about 500,000 m² of business space, equal to 63% of today's leasable stock (Heirstone analysis), so its phasing matters to both markets. BlackRock is helping shape the financial centre in Tashkent City, due to launch in 2027.

Hotels. Uzbekistan had 51 internationally branded hotels with 6,664 rooms in mid-2026, against 40 at the end of 2025, according to the Tourism Committee; Wyndham went from 6 to 11 hotels and Accor from 3 to 7. Tashkent's 2026 openings include DoubleTree by Hilton, Mercure Tashkent North, Mövenpick Tashkent Old City and Ramada Plaza.

New Tashkent has an early hotel market of its own. The 62-room Karakalpakstan hotel, one of twelve regional hotels built in 2025, sold at auction in 2026 for UZS 69.94bn, about US$95,000 a room (Heirstone analysis); the Fergana hotel's starting price implies about US$136,000.

CHAPTER 4

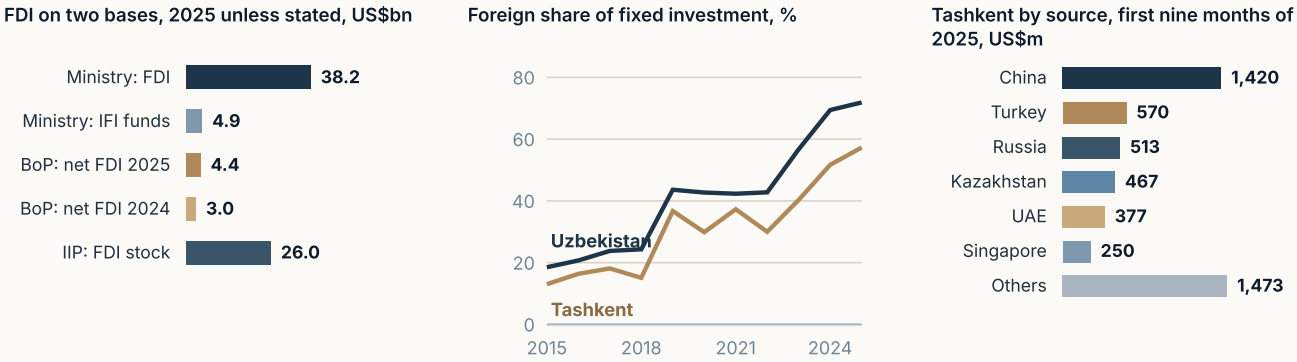

04 Who brings the capital

Most of the money building Tashkent now comes from abroad, through contractors, developers and lenders from China, Turkey, Russia, Kazakhstan and the Gulf, alongside the state.

EXHIBIT 13

Foreign investment and loans funded 57% of Tashkent's fixed investment in 2025, and China supplied 28% of the city's foreign investment in the first nine months of 2025

Left: two measures of foreign direct investment in Uzbekistan, US$bn; centre: share of foreign investment and loans in fixed investment, %; right: foreign investment utilised in Tashkent by source country, first nine months of 2025, US$m

Source: Ministry of Investment, Industry and Trade (2026); Central Bank of Uzbekistan, Balance of payments, IIP and external debt (2025; H1 2026), stock at the start of 2026; Statistics Agency, SIAT 1.04.01.0010 (2026); Tashkent hokimiyat via Spot.uz (2025). Shares: **Heirstone analysis.**

Two measures. The Ministry of Investment, Industry and Trade reported US$43.1bn of foreign investment implemented in 2025: US$38.2bn classed as FDI and US$4.9bn as funding from international financial institutions. It is a project-based measure, close to the statistics agency's series of foreign investment and loans used in fixed capital during the year. The central bank's balance of payments records net cross-border equity and intra-group debt flows, US$4.4bn in 2025 and US$2.3bn in the first half of 2026, the basis used to compare countries; the stock reached US$27.2bn by mid-2026. The first measure tracks foreign-funded projects implemented in the year, the second net financial flows.

Sources. China led Tashkent's foreign investment in the first nine months of 2025 with more than US$1.42bn of US$5.07bn, followed by Turkey, Russia, Kazakhstan, the UAE and Singapore. The Eurasian Development Bank puts accumulated Chinese investment in Uzbekistan at US$10.7bn and Gulf investment at US$8.3bn, about 90% of it in power and renewables. Tashkent absorbed UZS 59.2trn of fixed investment in the first half of 2026, 66.6% of it foreign, and plans to attract US$9bn of investment in 2026.

NAMED DEALS

Chinese contractors take the roads and renewal, Turkish firms the utilities and campuses, and Gulf capital the airport

EXHIBIT 14

In the named deals, Chinese partners build roads and renewal schemes, Turkish firms utilities, metro and campuses, a Kazakh developer homes and a Gulf-led consortium the airport

Named foreign counterparties in Tashkent, Tashkent region and New Tashkent real estate and city-building, with amount, date and status as reported; amounts in US$m

COUNTERPARTY	PROJECT	LOCATION	US$M	DATE	STATUS AS REPORTED
CHINA					
Partners at the Xi'an forum	EPC+F: roads and BRT, transport and social, renewal housing, drainage	Tashkent	3,350	2026	Signed
CSCEC	Roads, bridges and a mixed residential complex	Tashkent	999	2024	Agreements formalised
Shanghai Construction; Jibao Electrical	Roads, overpasses, transformer plants	Tashkent	970	2024	Agreements reached
Unnamed investors	Aktepa renewal: 568 flats replaced by 3,200	Shaykhantakhur	360	2024	Under way
CAMC Engineering	Olympic City, general contractor	New Tashkent	about 290	2022-2025	Built
Haocheng Industry Group	Substation and power lines	New Tashkent	95	2026	Commissioned
TURKEY					
Hvav Yapi	Metro first section from Dustlik	to New Tashkent	110	2025	Under construction
Mimsan	Trigeneration plant	New Tashkent	73	2026	Commissioned
Ozguven	New Uzbekistan University campus, builder	New Tashkent	about 200	2025-2027	Under construction
KAZAKHSTAN					
BI Group	'Astana' massif, 3,162 flats	New Tashkent	200	2025	First stage
BI Group and Murad Buildings (NRG)	NRG Oybek, 66,000 m²	Tashkent	33	2020-2021	Built
GULF, JAPAN AND KOREA					
Vision Invest 45%, Sojitz 30%, Incheon IAC 15%	New airport stage 1, with Uzbekistan Airports (10%)	Tashkent region	2,500-2,600	2026	PPP signed
Data Volt (Saudi Arabia)	Urban infrastructure	New Tashkent	1,000	2024	Announced
Al Majdiah; First Avenue (Saudi Arabia)	'Er-Riyadh' homes with Uzbek partners	New Tashkent	not published	2025	Planned
Korea Land & Housing consortium	Smart city on 400 ha	Bektemir	not published	2021	Memorandum
EUROPE AND RUSSIA					
Veolia (France)	District heating, 30-year affermage PPP	Tashkent	1,500 programme	2021-2022	Operating
St Petersburg government	'Saint Petersburg quarter' concept	New Tashkent	not published	2025	Concept

Source: Kun.uz (2024; 2025; 2026); Spot.uz (2024; 2025; 2026); Anhor.uz (2024; 2025; 2026); Interfax (2026); Zakon.kz (2021); Podrobno.uz (2025); Yuz.uz (2021); ADB (2026). Packages may overlap and are not summed. Vision Invest is described as Saudi by Kun.uz and Anhor.uz and as Emirati by Interfax.

Chinese counterparties are the most numerous, and their terms are changing: the US$3.35bn signed at the 2026 Xi'an forum is to be financed by Chinese partners under EPC+F, with staged payment and without budget funds or state guarantees.

No named UAE or Qatari property deal in Tashkent appears in the public sources we reviewed, although the UAE supplied US$377m of the city's foreign investment in the first nine months of 2025.

THE RULEBOOK

Foreign developers work through leases and joint ventures, and escrow is being phased in

EXHIBIT 15

Foreign investors lease rather than buy land, citizens of 108 countries may buy new homes, and escrow for off-plan sales is being phased in

Rules and support for foreign developers, buyers and lenders in Tashkent and New Tashkent, as published to 2026

AREA	RULE OR SUPPORT, AS PUBLISHED	SOURCE
Land in New Tashkent	Sold or leased by the Directorate on the E-auksion platform (PP-232). Large sites by Swiss Challenge; 100 ha for each Tashkent district and each of 13 regions, first auctions for local entrepreneurs; first 50 lots reserved for foreign investors (2026).	Lex.uz; Spot.uz (2026)
Land tenure for foreigners	Leasehold only: according to GRATA International, the Cabinet leases plots to foreign investors for up to 25 years, and foreign persons and foreign-invested firms cannot privatise land. Land under apartment buildings, in special economic zones and for PPP projects is excluded from privatisation. A 25.5 ha Tashkent plot sold at e-auction in 2025 on a 49-year lease.	GRATA International (2025); Spot.uz (2025)
Buying new homes	Citizens of 108 listed countries may buy new-build homes without a residence permit at US$150,000 off-plan or US$180,000 completed in Tashkent city, Tashkent region and Samarkand (US$70,000 and US$85,000 elsewhere). The list includes the UAE, Qatar, Kuwait, Bahrain, Oman, Turkey, Korea, Kazakhstan, Russia and Singapore, and excludes China, Saudi Arabia, India and Egypt.	Cabinet Resolution 384 (2022, amended 2026)
Developer finance	Decree UP-11 (2025) made escrow the only method for off-plan sales from the start of 2026; it was voluntary in early 2026 and the bill was in committee by mid-2026. The draft requires own funds of 10% of project cost, 5,000 m² already delivered, an unencumbered plot, a registry of contracts and a 10-year warranty. From the second quarter of 2026 all property purchases settle through notary-checked bank escrow accounts.	Spot.uz (2025; 2026); Kun.uz (2026)
New Tashkent incentives	Infrastructure fees cut threefold for retail, services and offices, fivefold for hotels, tenfold for cultural venues and to 1% for private kindergartens, schools and clinics. For projects of US$50m or more: a dedicated official, a separate investment agreement and state-paid green certification.	Spot.uz (2026)
Public-private partnership	Law ZRU-537 (2019): concepts above US$10m need Cabinet approval. The IMF put the PPP portfolio at US$31bn (27% of GDP) at end-2024, mostly energy; the 2025 budget caps new PPPs at US$6.5bn. In 2026 the government put forward US$27bn of infrastructure PPPs.	Lex.uz; Kun.uz on the IMF (2025); Spot.uz (2026)
Mortgage funding	ADB's mortgage market programme lent US$350m (2019-2022), partly as long-term funding through the Uzbekistan Mortgage Refinancing Company (UzMRC); ADB added US$30m (2025) and EBRD up to US$50m (2026) for UzMRC, which reports more than UZS 4.5trn of refinancing and UZS 590bn of bonds.	ADB 51348-001, 58383-001; EBRD 57269; uzmrc.uz

Source: As listed in the table. The 25-year maximum lease term is as summarised by the law firm GRATA International (2025).

Two features shape entry. Foreign investors cannot privatise land, so joint ventures with Uzbek landholders, such as BI Group's NRG with Murad Buildings, are the practical route to large sites. Citizens of China, the largest source of Tashkent's foreign investment, and of Saudi Arabia are not on the purchase list; those of the UAE, Qatar, Kuwait, Bahrain and Oman are.

Development finance is in transition. Off-plan construction funded by buyers reached more than 11m m² in 2025, according to the Ministry of Justice. The draft law's 10% own-funds rule and 5,000 m² track record favour well-capitalised developers, foreign ones included.

International lenders have built the mortgage channel. ADB and EBRD funding identified for the refinancing company totals at least US$430m; it reports more than UZS 4.5trn of refinancing, about US$378m at the 2026 rate (Heirstone analysis). Hungary's OTP Bank bought 73.41% of the mortgage lender Ipoteka Bank in 2023.

25 years
longest land lease for foreign investors, according to GRATA International

108
countries whose citizens may buy new-build homes in Uzbekistan

US$430m+
ADB and EBRD funding for mortgage refinancing (Heirstone analysis)

CHAPTER 5

05

What fills a new city

Twenty-three new capitals and new cities, from Brasília to Alatau, show what brings people to a city built beside a capital.

The Heirstone New City Benchmark covers 23 new capitals, administrative cities and new districts beside an existing city in Asia, the Middle East, Africa and Latin America. For each we record the start year, area, planned and latest population, the first anchor, the funding model, the distance from the parent city and the date of the first mass-transit link. Where a city is at least ten years old and both population figures refer to the new city itself, we compute a fill ratio: latest residents as a share of the plan.

The cases show two patterns. Cities that moved a government or a large employer filled fastest: the Federal District around Brasília passed the 500,000 planned for the city within ten years of its inauguration, and Sejong had reached 79% of its 2030 target by 2026, 19 years after construction began. Cities with an early rail link have filled further than those without: Putrajaya was linked by rail three years after the government moved, while Masdar City, served by road, had about 5,000 residents in 2023 against 50,000 planned.

Where daytime figures exist, the daytime population runs ahead of the residents. In Masdar City about 15,000 people lived or worked in 2023, only a third of them residents. Egypt's New Administrative Capital moved 40,000 civil servants in 2023, and its city company reports nearly 30,000 residents in 2026.

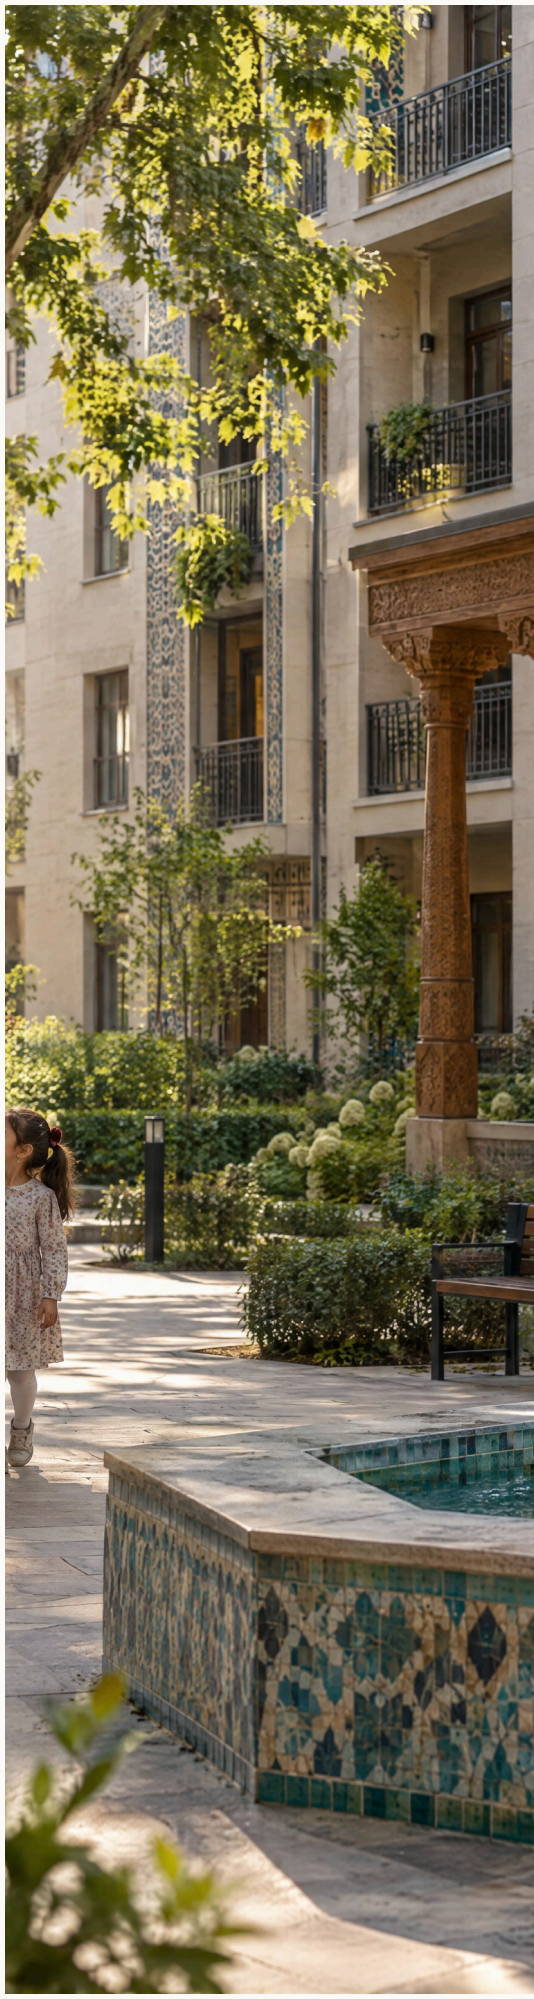

The benchmark draws on sources that range from censuses to developer statements, so we keep each measure as published and say where a figure comes from a developer. The pages that follow give the full table, the fill ratios and the timing of rail, the lead case of Egypt's New Administrative Capital and the six conditions of the Heirstone Fill Test, which the chapter then applies to New Tashkent.

15,000

people living or working in Masdar City in 2023, a third of them residents (Associated Press)

79%

of its 2030 resident target reached by Sejong in 2026, 19 years after construction began

THE HEIRSTONE NEW CITY BENCHMARK

Twenty-three new cities beside or instead of a capital, with New Tashkent for reference

EXHIBIT 16

Across 23 new cities the first anchor was most often a government move; of those old enough to measure, Brasília, Sejong and Navi Mumbai have filled furthest

Start year, area, planned and latest residents, fill ratio (latest residents as % of the plan, cities ten years or older on a like-for-like basis), distance, transit link and funding; New Tashkent shaded

Government move Business, industry or technology Mixed or event-led Other

Source: Heirstone New City Benchmark, compiled from national statistics offices, city and development authorities, developers and the press; sources by city are listed in the notes (chapter 5). NAC residents are ACUD statements. Brasília: Federal District, preliminary 1970 census. n/v: not verified; n/m: not meaningful (too young, mixed area or mismatched sources); n/a: not available. Fill ratios and New Tashkent distance: **Heirstone analysis.**

WHAT THE BENCHMARK SHOWS

Government and rail together separate the cities that filled from those that waited

EXHIBIT 17

Sejong has reached 79% of its target; Egypt's New Administrative Capital opened its light rail eight months before the government moved

Left: fill ratio, latest residents as % of planned residents, with years since start; right: years from the government or first anchor move to the first rail or bus rapid transit line

Source: Heirstone New City Benchmark (Exhibit 16). Masdar: about 5,000 residents against 50,000 planned. Brasília: Federal District, preliminary 1970 census. Not verified: Lusail and Songdo residents. New Tashkent: first metro section due end-2026, first ministries on site in 2025. Too early to measure: Egypt's NAC, Alatau, Nusantara, New Clark City, Amaravati, New Tashkent. **Heirstone analysis.**

The measured cities show the range. Sejong, where 47 central government bodies moved, had 79% of its target 19 years after construction began. Navi Mumbai, planned across the harbour from Mumbai, had about 65% after 50 years, and Putrajaya, the federal government seat, 34% after 30. Masdar City, a research and technology district served by road, had about 10% after 17 years.

Rail timing separates the capitals. Astana and Abuja opened their first rail lines 26 to 28 years after the government arrived. Putrajaya was linked by rail three years after the move. Egypt's New Administrative Capital opened its 70 km light rail line in 2022, eight months before the first ministries moved, and completed a 22-station monorail in 2026. Xiong'an opened its intercity line to Beijing almost four years before the first state firm moved its headquarters.

Among the capitals, Astana has grown fastest. It added almost 472,000 residents between 2021 and early 2026, about 90,000 a year (Heirstone analysis), and passed 1.7 million in 2026. Sejong had about 397,000 residents in 2026 and Putrajaya about 121,000 in 2025.

New Tashkent sits in the fast group on distance and timing. Its first ministries arrived about two years after the decree, and its first metro section is due about 16 months later, with the full line in 2027. What remains open is the size of the move: 150 bodies and 60+ buildings are planned, and nine buildings for 2,600 staff were under construction in late 2026.

8 months

between the opening of Egypt's LRT and the first ministries moving to the New Administrative Capital

90,000

THE LEAD CASE: EGYPT'S NEW ADMINISTRATIVE CAPITAL

Egypt moved its government first and laid the rails before it

EXHIBIT 18

Egypt opened the light rail in 2022, moved 100 agencies and 40,000 staff in 2023 and completed a 22-station monorail in 2026; residents are now following

New Administrative Capital milestones, 2015-2026; resident counts are statements by the city company ACUD

Source: Al Jazeera (2015); Business Today Egypt (2023); Egypt Today (2017); Ahram Online (2023; 2024); Cairo Governorate (2023); Al-Ahram Weekly (2023; 2024); Presidency of Egypt (2022); Africanews (2022); Invest-Gate (2025); Masrawy (2026); IWG plc (2021); Universities of Canada in Egypt; CTBUH; Arab News (2021); StadiumDB; Egyptian Streets (2026).

Egypt's New Administrative Capital is the clearest recent case of a government moving first. Plans were announced in 2015 for a city of about 714 km², 35 to 50 km east of central Cairo, for 6.5 million people. ACUD, the city company, was set up in 2016 and is owned 51% by the armed forces and 49% by the New Urban Communities Authority; its paid-up capital was EGP 20bn in 2017, according to Egypt Today.

The anchors came in order. The first international branch campus opened in 2018 and the 70 km light rail line in 2022. By mid-2023, 100 government agencies, including 30 ministries, and 40,000 employees had relocated, according to Cairo Governorate, and 9,000 flats in nearby Badr City were reserved for them, linked by shuttle buses and the light rail. The Government District's ten complexes will hold more than 50,000 staff.

Business and leisure followed: a Central Business District of 20 towers, ten of them offices with 806,000 m², the 393.8 m Iconic Tower, Egypt's tallest on CTBUH records, branches of Coventry University and NOVA University Lisbon, and the 93,940-seat Misr Stadium. The monorail, for up to 500,000 passengers a day, opened in full in 2026.

ACUD reported more than 15,000 residents in 2025 and nearly 30,000 in 2026, and expects 250,000-300,000 within three years. These are the city company's figures, and it is too early to measure a fill ratio against the plan. More than 400 developers were active in 2024, according to ACUD, under coverage caps of 25% for housing and 40% for commercial plots.

40,000

staff moved in about five months of 2023, with 100 agencies and 30 ministries

400+

developers active in 2024 (ACUD), under coverage caps of 25% for housing

THE HEIRSTONE FILL TEST

Six conditions recur in the new cities that filled

1 **Workday first**
A government or large employer moves in at scale with or before the first large housing hand-overs.

2 **Rail by the move**
A mass-transit link to the parent city opens before the anchor move or within three years of it.

3 **Commuting distance**
The new city lies within about 50 km of the parent city's core, or is linked by high-speed rail.

4 **A second anchor**
A business district, campuses, an airport, industry or a major event adds reasons to come beyond the first anchor.

5 **Many builders**
Plots are released in phases to many developers under published rules.

6 **A land company**
A city company or agency funds trunk infrastructure from land value.

The test scores each city only on the evidence in the benchmark, and marks a condition as not verified where the sources are silent. It is a checklist for sequencing a new city; it does not predict a population.

Egypt's New Administrative Capital meets all six. Sejong meets the first condition and partly meets the next three; Lusail meets four of the six. Masdar City, with neither a large move nor rail, filled least.

6 of 6
conditions met by Egypt's New Administrative Capital

3 + 3
met and under way in New Tashkent

EXHIBIT 19

Egypt's New Administrative Capital meets all six conditions; New Tashkent meets three and has the other three under way

Heirstone Fill Test: eleven new cities scored on six conditions, with fill ratio or status

● met ◑ partly met or under way ○ not met n/v not verified

CITY	1. WORKDAY FIRST	2. RAIL BY THE MOVE	3. COMMUTING DISTANCE	4. A SECOND ANCHOR	5. MANY BUILDERS	6. A LAND COMPANY	FILL
New Administrative Capital	●	●	●	●	●	●	too early; ~30,000 residents (ACUD)
Sejong	●	◑	◑	◑	n/v	n/v	79%
Lusail	◑	●	●	●	n/v	●	n/v
Navi Mumbai	◑	◑	●	●	n/v	●	65%
Putrajaya	●	●	n/v	◑	n/v	n/v	34%
Songdo	◑	n/v	●	●	●	n/v	n/v

Nusantara	◑	○	○	n/v	◑	n/v	too early
New Tashkent	◑	◑	●	●	◑	●	too early; 80,000 target for 2027

Source: Heirstone assessment based on the Heirstone New City Benchmark (Exhibit 16) and the sources cited there. Distance threshold: about 50 km or high-speed rail. Rail threshold: before or within three years of the anchor move. Lusail and Songdo resident counts not verified.

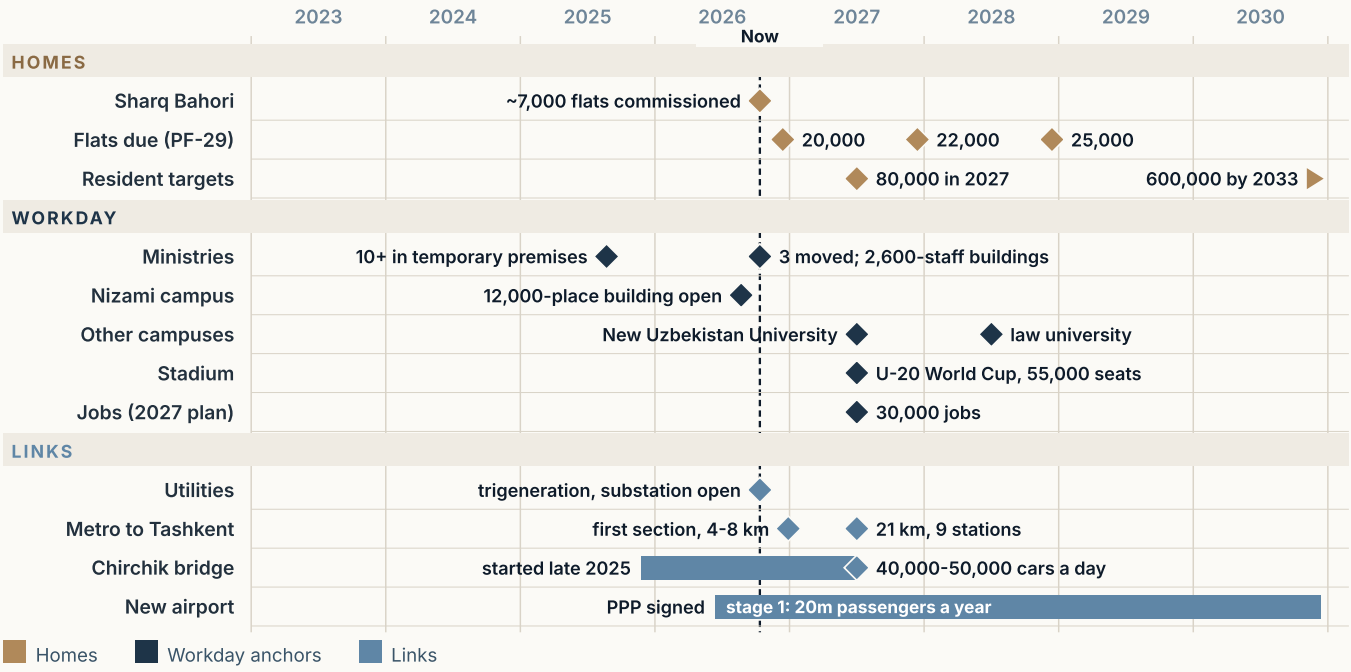

NEW TASHKENT AGAINST THE TEST

In 2026-2028 the homes and the workday arrive together, and the early residents will commute

EXHIBIT 20

New Tashkent's largest housing years, 2026-2028, coincide with its metro, campuses and stadium; the airport follows in 2030

Homes, workday anchors and transport links with dates as decreed or reported; the dashed line marks the date of this report

Source: Decree PF-29 (2026); Directorate (2026); Government portal (2025); President of Uzbekistan press service (2025); Spot.uz (2025; 2026); Kun.uz (2025); Interfax (2026); Lex.uz (PP-376). First metro section: 8 km and three stations (Kun.uz, 2025) or 4 km and two stations (Directorate, 2026).

1. Workday first	UNDER WAY	Over ten ministries in temporary premises from 2025, three moved by late 2026 and buildings for 2,600 staff under construction; 150 bodies are to move. The 2027 plan pairs 80,000 residents with 30,000 jobs, 0.38 per resident (Heirstone analysis).
2. Rail by the move	UNDER WAY	First metro section due by end-2026, about 16 months after the first ministries; full 21 km line and bridge in 2027.
3. Commuting distance	MET	About 17 km from the centre and 13 km from the first metro station, among the shortest in the benchmark with Nava Raipur (17 km).
4. A second anchor	MET	Four campuses, three of them with about 32,000 places in all, the stadium, the National Library, the Deep Tech Park, Metropolis and the adjoining airport.
5. Many builders	UNDER WAY	54 lots sold and 707 listed; 100 ha for each district and region; 50 lots for foreign investors.
6. A land company	MET	The Directorate sells land on E-auksion, reported a net profit in 2025 and holds UZS 43.9trn of assets.

Applied to New Tashkent, the test points to one period where the clocks have to be held together: the hand-overs of 2026-2027. With 80,000 residents targeted for 2027 against 30,000 planned jobs and about 22,000 student places open or due, most early residents will work in old Tashkent.

The first metro section and the Chirchik bridge therefore carry the first years, and each tranche of ministries that moves adds residents who no longer need them. In Egypt the light rail came first and 9,000 flats were reserved for the civil servants who moved.

CHAPTER 6

06

The Gulf and Egyptian lens

Gulf capital is large in Uzbekistan and still small in its cities: about 90% of the US$8.3bn the Eurasian Development Bank tracks is in power and renewables. Egypt brings recent, directly relevant experience of building a new capital. This chapter sets out where each stands in Tashkent and what Egypt's experience offers New Tashkent.

EXHIBIT 21

Gulf capital has reached Uzbekistan's power sector and new airport more than its housing; the new-home list covers five Gulf states but not Saudi Arabia or Egypt

Gulf and Egyptian links to Tashkent and New Tashkent: purchase eligibility, capital, named counterparts and the entry routes the evidence points to (Heirstone assessment)

COUNTRY	ON NEW-HOME LIST	CAPITAL IN UZBEKISTAN	NAMED COUNTERPARTS, TASHKENT AND NEW TASHKENT	ENTRY ROUTES THE EVIDENCE POINTS TO
United Arab Emirates	Yes	Gulf states US$8.3bn in Uzbekistan, about 90% power (EDB); UAE US$377m into Tashkent in the first nine months of 2025; 352 firms with UAE capital	Named as a New Tashkent partner country (2023, 2026); the Directorate plans a Dubai office (2027 plan); no named property deal found	Lots of US$50m+ with a dedicated official; joint ventures with Uzbek landholders; mid-scale hotel conversions
Saudi Arabia	No	Within the Gulf total	Vision Invest, 45% of the airport consortium (Saudi according to Kun.uz and Anhor.uz, Emirati according to Interfax); Data Volt, US$1bn urban infrastructure (announced 2024); Al Majdiah and First Avenue, Er-Riyadh homes (planned)	Airport-linked districts; rental housing for Uzbek and listed-country tenants
Qatar	Yes	Within the Gulf total	None found	Event-led districts around the 2027 stadium; hotels
Kuwait, Bahrain, Oman	Yes	Within the Gulf total	None found	Co-investment beside a lead developer
Egypt	No	Egyptian firms among 2024 forum signatories: Nil Shugar (US$500m sugar project, Jizzakh); Orascom Investment	None in Tashkent	City-company, master-planning, contracting and transit-oriented development services

Source: Cabinet Resolution 384, Annex 1 (checked 2026); Eurasian Development Bank via The Times of Central Asia (2026); Tashkent hokimiyat via Spot.uz (2025); Kun.uz (2024; 2025; 2026); Anhor.uz (2025); Interfax (2026); Podrobno.uz (2025); Directorate (2026). 'None found' refers to the public sources reviewed.

The airport. Vision Invest, Saudi according to Kun.uz and Emirati according to Interfax, holds 45% of the consortium building the new terminal beside New Tashkent, due by the end of 2030.

Saudi Arabia and the UAE. UAE citizens may buy new homes and Saudi citizens may not, so Saudi developers, such as those behind the planned Er-Riyadh homes, would sell to Uzbek and listed-country buyers or hold rental stock.

Egypt. Egyptian groups signed at the 2024 Tashkent investment forum, and Egypt has 61 new cities with more than 8 million residents, according to the deputy housing minister in 2022.

US$8.3bn

accumulated Gulf investment in Uzbekistan, about 90% in power (EDB)

61

new cities in Egypt's programme, with more than 8 million residents (2022)

WHAT EGYPT'S NEW CAPITAL OFFERS NEW TASHKENT

Six lessons from Cairo's new capital for the sequence in Tashkent

1 Move the staff in blocks, with homes for them

Egypt moved 100 agencies and 40,000 staff in about five months of 2023 and reserved 9,000 flats in 376 buildings in Badr City for them, linked by shuttle buses and the light rail. New Tashkent can match tranches of its 150 relocating bodies to the PF-29 hand-overs of 2026-2028.

2 Open the line before the move

The 70 km light rail opened eight months before the ministries moved, and the 56.5 km monorail followed in 2026. New Tashkent's first metro section and the Chirchik bridge are due in 2026-2027, as its largest housing years begin.

3 Let a city company sell land and build the trunk

ACUD sells land to developers and builds the trunk infrastructure; according to Ahram Online it reported EGP 19.8bn of pre-tax profit in 2022 and a capitalisation of EGP 204bn, and planned to list up to 10% of its shares. New Tashkent's Directorate already sells land through E-auksion and reported a profit in 2025.

4 Release land to many builders under clear rules

More than 400 developers worked in the NAC in 2024, according to ACUD, under coverage caps of 25% for housing and 40% for commercial plots and a plan for more than 15 m^2 of green space per resident. New Tashkent plans 30% of its first stage as parks.

5 Put universities in early

The NAC's first international branch campus opened in 2018, five years before the government moved. New Tashkent opened its first 12,000-place teaching building in 2026.

6 Pool the vacated buildings

Presidential Decree 13 of 2024 transferred the central-Cairo buildings of 13 ministries to The Sovereign Fund of Egypt, according to CairoScene, and in 2021, according to World Construction Network, a consortium including Al Otaiba Investments won the contract to turn the Mogamma into a hotel of more than 450 rooms. Tashkent has sold seven ministry buildings for UZS 868.8bn (US$73.45m), with 11 more at auction.

THE REGIONAL RACE

88,000 ha

Alatau, Kazakhstan: special status since 2025, up to about 2 million people and some KZT 10trn of investment needed by 2050, according to The Times of Central Asia

91

Baku White City: buildings completed by 2024 on a 1,650 ha district for 280,000 residents and 240,000 jobs

+472,000

Astana: residents added between 2021 and early 2026; the capital passed 1.7 million in 2026

Alatau, about 50 km from Almaty, is the closest in kind: a new city beside a large existing city, run by a state fund, Alatau City Authority.

TASHKENT'S MOUNTAIN HINTERLAND

Bostanliq district, home to the Chimgan and Amirsoy resorts and Charvak reservoir, with Amirsoy 65 km from the city, received more than 12 million tourists in 2024, according to the regional hokimiyat. A Kyrgyz–Uzbek memorandum of 2025, according to ADB, links these resorts with Kyrgyzstan's Chatkal District in a cross-border tourism cluster, which Heirstone Consulting's companion report on Kyrgyzstan also covers.

EGYPT'S PROGRAMME

65m

residents targeted at maturity across Egypt's 61 new cities, built in four generations of 8, 8, 6 and 39 cities (deputy housing minister, 2022)

CHAPTER 7

07 What to do

The recommendations below follow from the evidence in chapters 1 to 6 and focus on 2026-2028, when New Tashkent's largest housing tranches and its workday anchors are due together.

FOR

Government and the New Tashkent Directorate

Tie each tranche of relocations to housing hand-overs and transit. Publish the schedule for the 150 bodies and 60+ buildings next to the PF-29 targets, and reserve rental homes for relocating staff, as Egypt did with 9,000 flats in Badr City.

Open the first metro section and the Chirchik bridge ahead of the 2027 hand-overs, and keep the U-20 World Cup match-day bus route as a permanent service.

Publish a quarterly dashboard: residents, staff and students on site, lots started out of lots sold, metro ridership and auction prices.

Pool vacated ministry buildings in one redevelopment vehicle, as Egypt did with its sovereign fund in 2024, and review whether the purchase list should cover the countries whose firms are building the city.

FOR

Developers

Design the mass product to the mortgage cap: a home of about UZS 565m (US$47,500) buys 42-48 m² at city averages and about 49-51 m² at outer-district asking prices.

Build for the daytime population first: student beds beside the Nizami and New Uzbekistan University campuses, rental flats for relocating staff, and serviced apartments and hotels near the stadium before 2027.

Enter through joint ventures with Uzbek landholders, use the 50 lots reserved for foreign investors and the US$50m threshold, and prepare for escrow's 10% own-funds rule.

FOR

Foreign investors and development finance institutions

Compare Uzbekistan with peers on the balance-of-payments basis (US$4.4bn net FDI in 2025) and read the ministry's US$38.2bn as a measure of foreign-funded projects implemented in the year.

Fund trunk links on the Amaravati model: in 2024 the World Bank (US$800m) and ADB (US$788.8m) approved loans for a new state capital's infrastructure. New Tashkent's law university already uses concessional IFI funds.

Offer dollar equity for rental housing: gross yields of about 9% against mortgages of 17-24% leave tenant demand from students and staff that buyers' finance cannot meet.

In offices, favour fitted Class A floors: 67,000 m² of prime space was vacant in 2026 as Metropolis plans about 500,000 m².

FOR

Banks and mortgage lenders

Lengthen som funding through UzMRC bonds and the ADB and EBRD lines, at least US$430m so far against an estimated need of 145,000 urban homes a year.

Price by income: Egypt's social housing fund charges 8% and 12% by income band and had facilitated 583,008 mortgages by mid-2024.

In New Tashkent, lend first to staff of relocating bodies and to homes within walking distance of the first metro stations, and build escrow-based project lending as the law takes effect.

WHAT TO WATCH

Ten indicators will show whether the workday and the homes are arriving together

Most of these figures are already published by the Directorate, the statistics agencies and the central bank. Read together, quarter by quarter, they show the balance between residents, staff and students on which the city's first years depend.

INDICATOR	LATEST	NEXT MARKER	SOURCE
Residents in New Tashkent	20,000 flats for 70,000+ people due by end-2026	80,000 (Directorate target)	Directorate; Spot.uz
Staff working on site	10+ ministries in temporary premises (2025); three moved; 2,600-staff buildings under way	150 bodies to move; 30,000 jobs in the 2027 plan	Government portal; Spot.uz
Students on campus	Nizami 12,000-place building open (2026)	New Uzbekistan University, 10,000 students	Spot.uz
Lots started	26 of 54 sold lots (2026)	larger lots via Swiss Challenge	Spot.uz
Metro and bridge	first section due end-2026 (4-8 km)	21 km, 9 stations; bridge for 40,000-50,000 cars a day	President's press service; Kun.uz; Directorate
Land price at auction	UZS 19bn per ha (2026)	Directorate value up to US$5m per ha (plan)	Spot.uz; Directorate
Tashkent resale price	US$1,133 per m² (early 2026)	quarterly index, new hedonic basis	CERR; Statistics Committee
Mortgage rate	22.2% average (mid-2026); state-funded 16.8%	UzMRC bonds; 30,000 subsidies in 2026	Central bank; Kursiv
Escrow law	voluntary in early 2026; bill in committee by mid-2026	mandatory escrow	Kun.uz; Spot.uz
New airport	PPP signed (2026)	stage 1 opens by end-2030	Interfax; Anhor.uz

THREE DATES

26 **End-2026**
First metro section and 20,000 flats due; first full year of the Directorate's late-2026 incentives.

27 **2027**
Full metro line and bridge, New Uzbekistan University campus, the FIFA U-20 World Cup and the 80,000-resident target.

28 **2028**
25,000 flats due, the law university's move and the third year of the PF-29 programme.

How Heirstone works on new cities

We help governments, master developers, investors and lenders decide what to build, in what order and for whom: market and demand studies for housing, offices, hotels and student housing, highest-and-best-use studies, phasing and anchor strategy, feasibility and business models (DCF, IRR, NPV and Monte Carlo testing), and benchmarking of the kind in this report.

info@heirstoneconsulting.com | heirstoneconsulting.com

NOTES, SOURCES AND DEFINITIONS

Notes

Definitions

New Tashkent: the 19,720.9 ha selected by Resolution PP-232; other sources give 19,729.31 ha, 20,000 ha, 25,000 ha or 200 km^2, recorded as stated. **Fill ratio:** latest residents divided by planned residents, computed only for cities at least ten years old where both figures refer to the new city itself (Brasília on its Federal District). **Daytime population:** people who work or study in a city, whether or not they live there. **FDI, two bases:** the ministry and statistics agency count foreign investment and loans used on projects in the year; the balance of payments records net cross-border equity and intra-group debt flows. **Asking prices** are listings, not transactions.

Method

The Heirstone New City Benchmark compiles 23 new cities and capitals from official, developer and press sources; the Heirstone Fill Test scores them on six conditions using only that evidence. The Heirstone Capital Housing Index combines local price sources with Numbeo's crowd-sourced salary, mortgage and yield data, which are indicative only, for a consistent cross-city basis; Cairo appears for price only, on Aqarmap's end-2025 listing basis, because that series changed basis in 2025. The Heirstone Tashkent affordability index divides the national average wage by the annual mean of the Tashkent resale price index. Som values for 2026 are converted at the Central Bank of Uzbekistan rate of UZS 11,899.09 per US$ (2026) and those for 2023-2025 at the average of that year's quarter-end US Treasury reporting rates (UZS 11,855, 12,653 and 12,393); multi-year som totals are converted at the 2026 rate and marked as such. Peer currencies use US Treasury rates at the end of the third quarter of 2026 (KZT 439.98, AZN 1.70, GEL 2.567, TRY 49.001, AED 3.673, EGP 51.89). Where sources conflict we give the range or the more conservative figure and attribute each; New Administrative Capital resident figures are ACUD statements. Map positions are OpenStreetMap coordinates except where marked approximate.

Use of this report

This report is published for general information. It is not investment, legal or valuation advice and should not be relied on as such. It uses only public information, and no government body, developer, investor or lender named in it reviewed it. Images are illustrative.
